

Day 03 Python Interview Questions

Q1. What is a function?

A reusable block of code that performs a specific task.

Q2. Parameter vs Argument

Parameter is defined in a function; argument is the value passed.

Q3. What does return do?

Returns a value and exits the function.

Q4. What is a lambda function?

A small anonymous function using lambda.

Q5. What is recursion?

A function calling itself until a base condition.

Q6. What is a module?

A Python file containing reusable code.

Q7. Difference between *args and **kwargs

*args collects positional arguments; **kwargs collects keyword arguments.

Q8. What is exception handling?

Handling runtime errors using try, except, else, and finally.

Q9. Purpose of finally?

It always executes, whether an exception occurs or not.

Q10. What is raise?

Used to manually trigger an exception.
