

Day 2 Python Cheat Sheet

- if: Executes code when condition is True.
- if-else: Chooses between two outcomes.
- if-elif-else: Handles multiple conditions.
- Nested if: if inside another if.
- Comparison: == != > < >= <=
- Logical: and, or, not
- for loop: Fixed iterations using range().
- while loop: Repeats while condition is True.
- break: Exit loop.
- continue: Skip current iteration.
